

EASTERN NEWT

DID YOU KNOW?

UNLIKE MOST LOUISIANA AMPHIBIANS WHICH HAVE TWO LIFE STAGES, EASTERN NEWTS HAVE THREE LIFE STAGES; THE AQUATIC LARVAL STAGE, THE RED EFT OR TERRESTRIAL JUVENILE STAGE, AND THE REPRODUCING AQUATIC ADULT STAGE.

DID YOU KNOW?

EASTERN NEWTS PRODUCE SKIN TOXINS THAT MAKE THEM TASTE BAD TO PREDATORS, ALLOWING THEM TO LIVE IN PERMANENT WATERS AMONG PREDATORY FISH AND INVERTEBRATES.
